

Christine Lin

Software Engineer, Toronto ON

lin.christine19@gmail.com | github.com/christinelinster | linkedin.com/in/christinelin19 | christine-lin.vercel.app/

SKILLS

Languages: Python, JavaScript (ES6+), Typescript, SQL, HTML5, CSS3

Frameworks & Libraries: FastAPI, Flask, React, Node.js, Express.js

Databases & Tools: PostgreSQL, Git, GitHub, Postman, Render, Vercel

Engineering Practices: OOP, Test-Driven Development (TDD), Agile/Scrum (JIRA), RESTful API Design, Database Design

TECHNICAL EXPERIENCE

Software Developer, Freelance, Toronto

2025 - Present

- Led client engagements from requirements gathering through iterative design and deployment, using React, Node.js, and TypeScript to deliver responsive web solutions on time and to specification.
- Developed client websites from the ground up, implementing SEO metadata and mobile-first UI/UX to establish clients' first online presence and improve local discoverability.

Oracle Practice Lead, RedIron Technologies, Toronto

2021 - 2025

- Spearheaded Oracle Cloud partnership, overseeing the technical roadmap and establishing the infrastructure to launch 3 SaaS offerings across 8 multinational retailers.
- Led Agile sprint cycles for RI Transact (PWA), driving user story refinement, backlog planning, and QA to deliver a mobile-first retail extension to production.
- Coordinated technical integration between internal and Oracle engineering teams for RI Commerce, supporting an 855-store deployment generating \$800K ARR.
- Authored technical documentation for Pulse, an observability platform, translating system architecture into feature specifications that supported a 500+ store pilot and rollout.

FEATURED TECHNICAL PROJECTS

[Portfolio Intelligence](#) | Python, FastAPI, React, Gemini API, Anthropic API, yFinance, Pandas

Full-stack portfolio look-through engine that deconstructs ETF holdings to surface underlying asset exposure and tax implications, delivering context-aware insights via Gemini API integration and real-time market data from yFinance.

[Wanderly](#) | Python, Flask, PostgreSQL, Javascript

Full-stack travel planner for building multi-day itineraries with activity scheduling and cost tracking. Designed normalized PostgreSQL schema with server-side validation, MVC architecture, pagination, session management, and authentication.

EDUCATION & CERTIFICATIONS

Launch School

2025 - Present

Software Engineering

- Completed 1,200+ hours of mastery-based training, assessed through live and written coding interviews.
- Mentored 10+ students on software development fundamentals and Object-Oriented Programming in Python.

Ivey Business School, Western University

2017 - 2021

Bachelor of Arts, Honors Business Administration

- **Relevant Courses:** Derivatives & Risk Management, Value Investing, Private Equity, Wealth Management, Introductory Data Science

Certified Scrum Product Owner, Scrum Alliance

2024

Agile Project Management, Google

2023
